

What is claimed is:

1. A solvent composition for dissolving plastic comprising:
at least either isopropyl bromide or n-propyl bromide; and
5 at least either nitromethane or nitroethane,
wherein a content of said at least either nitromethane or
nitroethane is 5 through 50 wt% with respect to an entire amount
of said solvent.
- 10 2. A solvent composition for dissolving plastic according to
claim 1, further including a fluorine-based solvent.
3. A solvent composition for dissolving plastic according to
claim 1, further including N-methyl pyrrolidone.
- 15 4. A solvent composition for dissolving plastic according to
claim 1, wherein the content of said at least either nitromethane
or nitroethane is 10 through 40 wt% with respect to the entire
amount of said solvent.
- 20 5. A solvent composition for dissolving plastic according to
claim 4, further including N-methyl pyrrolidone.
6. A solvent composition for dissolving plastic according to
25 claim 1, wherein the content of said at least either nitromethane
or nitroethane is 10 through 35 wt% with respect to the entire
amount of said solvent.
7. A solvent composition for dissolving plastic according to
30 claim 6, further including N-methyl pyrrolidone.

8. A solvent composition for dissolving plastic comprising:
at least either isopropyl bromide or n-propyl bromide; and
N-methyl pyrrolidone,

5 wherein a content of N-methyl pyrrolidone is 5 through 85
wt% with respect to an entire amount of said solvent.

9. A solvent composition for dissolving plastic according to
claim 8, further including a fluorine-based solvent.

10

10. A solvent composition for dissolving plastic according to
claim 8, wherein the content of N-methyl pyrrolidone is 10 through
85 wt% with respect to the entire amount of said solvent.
